Memorial Trees and Shrubs

- For full burials we must allow the ground to settle prior to planting a tree, this can be dependent on weather conditions but is typically 6 – 7 months.
- You will be invited to attend and participate in the planting of the tree.
- Typically, our planting season is between November and March, subject to weather conditions.
- We will monitor the health of your tree and will take necessary action up to and including replacement of the tree in the first 5 years after planting. However, we cannot accept any responsibility in the event of extreme weather, and we suggest that you water the tree during extended dry periods.
- You may request planting of the tree outside of our recommended planting periods. We will plant upon your instruction but will not be liable for failure due to weather conditions.
- On occasions we may trim or remove a tree without notification if they preclude the development of other trees, are obstructing a footpath or grave, or for health and safety reasons.

Bird, Bat, and Nature Boxes

- We will always endeavour to fix these in a spot selected by a family, or in the closest appropriate position to the grave. We are unable to fix to newly planted trees until they are mature enough to withstand the weight of the item.
